Open your browser and type in http://www.fleuritsolutions.com.au/cpanel

You should see a login page (screenshot to your left)

Type in the username: _____

and the password: _____

Left click on the Log In button.

This should take you to the cpanel page, if it does not double check what you entered in the username and password field.

Scroll all the way to the end of the page, look for the heading Softaculous Apps Installer

Click on the wordpress icon (circled in red in the screenshot on your right)

Virus	MIME Types	-			
Scanner		Softaculous	Apps Installe	r	
Scripts:					
WordPress	oomla Ope 2.5 1	nCart 5 Presta	aShop Drupal	PhpBB	Joomla Aba
Categories :					
als/CMS For	5 vims Image Galleries	Wikis S Netv	ocial v working Manag	Ad Caler gement	ndars Gaming
Light Graphics	Hide Icons	Reset All Inte	erface Settings	Reveal All Bo	xes Reset

This should open the Softaculous page, see the screenshot below

Select Blogs from the left hand menu (see above circled in red), then wordpress (see the screenshot below, circled in red)

Select Install, this opens the page below, *very important use the drop down menu to choose the subdomain* you where given at the start of class

Choose Protocol If your site has SSL, then please choose the HTTPS protocol.	http://
Choose Domain Please choose the domain to install the software.	websig1.fleuritsolutions.com
In Directory The directory is relative to your domain and should not exist. e.g. To instal http://mydomain/dir/ just type dir. To install only in http://mydomain/ leave	l at this empty.
Database Name Type the name of the database to be created for the installation	wp694
Database Settings	
Table Prefix	wp_
Site Settings	
Site Name	My Blog
Site Description	My WordPress Blog

In directory is another important option if I leave my installation as wp my url will become

01.fleuritsolutions.com.au/wp/

Scroll down the page, give your site a name and description

Site Name	Moto PC Websig website
Site Description	Melb PC Websig wordpress website
Enable Multisite (WPMU) This feature will Enable Multisite option for your WordPress blog. Your server must support Apache mod_rewrite to use this feature.	
Admin Account	
Admin Username	admin
Admin Password	pass 🖉
Admin Email	admin@websig1.fleuritsolutions.com
Choose Language	

Create a username and password (make a note of your username and password, as you will need it to log into your site)

Scroll all the way to the end of the page, add an email address to send the installation details to and hit install, see the screenshot below.

	Appl Packpat P	Rariseinadriauc. Safranc ague. Why is it reeded.
