Editorial May 2021

Hugh Macdonald

Hello and welcome to another edition of PC Update.

This month the highlights include:

- Dave Williams with the first part of his series on building his own CNC Router
- Dan Douglas with tips on backing up your Windows PC (I'll have a follow up next month on backing up your Linux PC)
- Phil Sorrentino on using casting, not in the theatrical sense (i.e. how to use a Chromecast)

Plus there's some of the usual features: Presidential Musings, Interesting Internet finds, Yammer Highlights, DOTW Winners and the East SIG Report.

Enjoy the issue!
