

My intent as a member is to help broker new opportunities for those intimately involved with the club and to create better accessibility for those newer and more casually associated. I want not just facilities as the traditional expansion of a toolset but as a way of bringing people together in the long term.

The world is hyper-complex, increasingly so; everyone needs a community, we can create a driven unit, dedicated to lifting each other up in a space that is collaborative and safe. Safe to explore capabilities that would otherwise be off limits or restricted.

People of my generation are frustrated in knowing that heritage skills are achievable, but not easily accessible, either because of the stigmatisation of trade skills or the reduction of economic relevancy. Nobody should be barred by sheer circumstance from pursuing new abilities, we have the space, the time and the wherewithal to provide.

I want to emphasise consistent inter and intra group communication as well as the mixing with other organisations in order to create a functional sharing of resources. By extending our relationships, we can attract new members as well as creating new opportunities for existing members.
