

Honorary Life Member since 2003.

I have worked in various volunteer capacities for the group over 30 years including SIG Convenor, CommsTeam member, BBS Sysop Roles, Swap Meet Volunteer, Training Sub-Committee and Committee Member.

Currently Volunteer Co-ordinator, Co-Convenor of Microcontroller and Waffle SIGs.

Recently I have helped to organise the Volunteers Party and organised catering for the SIG Leaders Conference; Organised and lead promotional teams to Melbourne Society of Model Experimental Engineers Exhibition on behalf of MelbPC and the Microcontroller Groups;
Helped organising the Melbourne PC User Group Open Day at Moorabin.

Aims:

Ensure respect and inclusiveness for all volunteers and members.

Create new membership services plus ensure continuity of current services that both existing and potential members would want.

Continue to foster volunteer team efforts to create and maintain cost effective services as we have in the past. Volunteers made our group great in the past and through the team work and efforts of these individuals they should also bring a bright new future for the entire club.

Encourage more member participation in club activities, whether it be as a Volunteer, SIG attendee or Online User.

Ensure that all club assets are used to their maximum benefit for members.
