

I'm grateful my peers for allowing me, a basically unknown person to assume role of Vice-President this past year.

Thanks to many dedicated members, SIG leaders and volunteers, our club has a solid base upon which it can grow.

We have experienced members as David, Harry, Stewart, John & Rob to provide our committee with a source of stability and support our governance. These people have a mind to the future, with regard to how we can protect our organisation from anything that might compromise its integrity.

Some of these others are less known, and are worthy of mention.

Hugh, with his careful sound reasoning, has done a great job renewing PCU.

Flynn, a multi skilled artisan with strong technical and communication skills, he has a clear sense of what the club can be for people.

Dave, an inspired sound engineer with a keen sense of how the club can enable people to make and create things.

Aavon, an engineer with a clear sense of practicality, commercial reality and what the club can evolve into for its members.

Paul, an experienced nurse and volunteer leader, he has always been inspired by what the club can become and contribute to the community.
