

Accessing your Computer Bios

Sometimes you may need to enter the Bios configuration to change the boot sequence or other settings. To do this Press and hold the Bios key during Start-Up.

The key for this may vary with different Computers, so here are a few examples for commonly known machines.

IBM or Lenovo – F1

Acer, Asus or Dell or NEC – F2

Phoenix or Gigabyte boards– Del

Gateway, HP or Sony – F10

Toshiba – F12
