

Change or Reset your Office 365 password

You can change your password anytime by logging into Office 365 on the web, clicking "Settings | Password".

If you lose or forget your Office 365 password, this can only be reset by the MelbPC admin team. Simply send a request to support365@melbpc.org.au with your membership details. A "new" password will then be created and advised to your registered alternative email address or phone number. On login you may then need to supply a new permanent password before proceeding to your account.

Members without an alternative email account should phone the office or iHelp and an arrangement will be made on your behalf.
